SECURASTOCK

THE SECURASTOCK ADVANTAGE

One Platform. A Solution for Every Inventory Challenge.

Choose the level of control, automation, and security that fits the application — then manage it all through SecuraSmart.

CONTROL**Secure Access and Accountability**

Secure authentication (badge or keypad), zoned access control, and video-based transactions, safe and secure.

AUTOMATE**Weight-Based for Speed and Accuracy**

No more scanning, no menus, just take what you need and get back to the job. Turn any space into a fully automated storeroom

EXTEND**Add to Your System to Customize it Your Way**

With Add-Ons, you can build a custom solution that meets the application needs perfectly.

CONNECT**ERP System Integration Means 24/7 Access**

No more manual reconciliations. Bring our data directly into your ERP for forecasting and intelligent planning. Access your data from anywhere 24/7

Value first: Reduce stockouts and overstock, improve accountability, automate replenishment, and give teams faster access to the inventory they need.

POINT-OF-USE-VENDING (CASTERS AND STANDS INCLUDED)

SecuraStock

High Capacity, Low Cost Per SKU

[View Brochure](#)

The flagship open-shelf vending platform combines visibility, access, and accountability without the complexity of traditional coil vending.

- High capacity 250 SKUs
- Holds 2-4 times a traditional coil or carousel vending unit
- Integrated camera system for video-backed transaction accountability
- Compatible with SecuraScales and Locker / Tower Add-On units
- Secure authentication

SecuraLocker

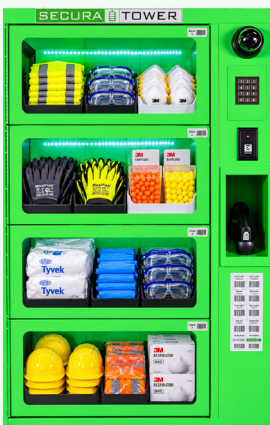

Zoned Access, includes SecuraScales

[View Brochure](#)

A flexible locker system for consumables, tools, and durable assets. Fast access and 100% accuracy.

- Highest capacity in sq-inches available
- Secure authentication and user-level control
- Integrated camera system for video-backed transaction accountability
- Available as a Stand-Alone or Add-On
- Secure Authentication

SecuraTower

Zoned Access - Slim Footprint - Built for Bulk

[View Brochure](#)

Four secure access zones give teams the freedom of open shelves with stronger control over who can access specific inventory.

- High capacity 125 SKU's
- Perfect for bulk items and PPE
- Integrated camera system for video-backed transaction accountability
- Available as a stand-alone or add-on
- Secure authentication and user-level control

ADD-ONS, OPEN ACCESS, AND CUSTOMER SHELF

ADD-ONS

[View More Online](#)

- Allows you to expand your stand-alone unit with additional storage.
- Simply connect the add-on unit to your main stand-alone unit (SecuraStock, SecuraChem, SecuraLocker, SecuraTower, SecuraCrib, SecuraPort, or SecuraTrack)
- Mix and match any configuration
- Choose from SecuraLocker, SecuraTower and Open Access configurations. (see below for more information about Open Access)

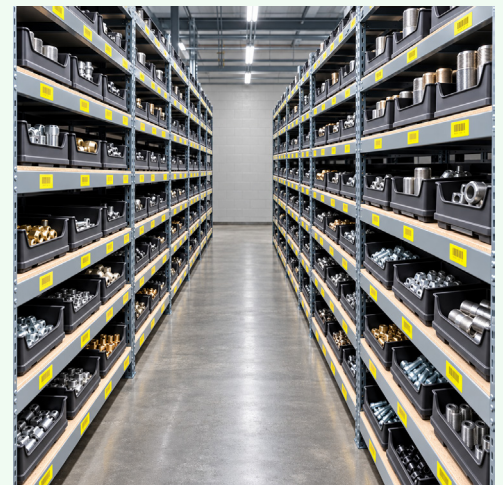

OPEN ACCESS

- Configure as a stand-alone or an add-on unit
- Designed specifically for SecuraScales
- Bypass authentication and have immediate access to your inventory
- Drives the time to vend to ZERO SECONDS
- Ensures impeccable accuracy

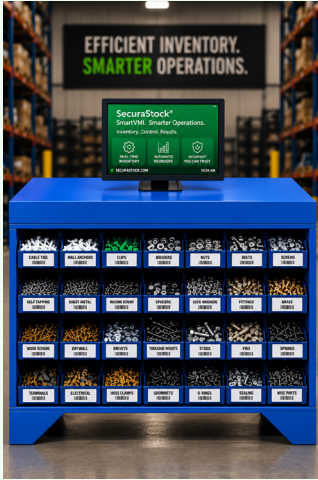

CUSTOMER SHELF

- Utilize existing shelving with SecuraScales to create an autonomous warehouse or storeroom
- Reduce time to vend here to ZERO SECONDS
- Ensures impeccable accuracy

WEIGHT-BASED SOLUTIONS (AUTONOMOUS INVENTORY)

SmartBins

Advanced Sensing - Intelligent Inventory

Workflows that automatically sends notifications and initiates re-orders.

- 28-bin capacity - a brain in every bin
- Stack three high
- Weight-based sensing for 100% accuracy
- Precise to a single piece and accurate to one gram

[View Brochure](#)

SmartDrawers

Advanced Sensing - Intelligent Inventory

Automate inventory and create workflows that automatically send notifications and initiate reorders.

- Multiple configurations (24, 20, 16, and 6 compartments), each with its own brain.
- Stack three high
- Weight-based sensing for 100% accuracy
- Precise to a single piece and accurate to one gram

[View Brochure](#)

SecuraScales

Advanced Scale Technology

Best way to automate a storeroom or a crib. Add to a vending solution or to customers' existing shelves.

- Weight-based sensing for 100% accuracy
- Precise to a single piece and accurate to one gram
- Never requires calibration
- Fastest vending solution available

STOREROOMS AND REMOTE SITES

SecuraCrib

[View Brochure](#)

Transform Any Space into a Smart Storeroom

Create a storeroom that suits your needs. Scalable and versatile - build your on-site solution to manage any level of complexity.

- Includes our control panel and magnetic locking system
- Includes camera system with 24/7 monitoring
- Add SecuraScales for improved autonomy, speed, and accuracy
- Add any of our vending solutions to create additional control

SecuraPort

[View Brochure](#)

All the Benefits of a SecuraCrib, but Fully Mobile

SecuraPort allows you to convert any CONEX container into a remote-site storeroom.

- Custom gate with authentication, control panel and locking system
- Easy installation — have your storeroom up and running in under a day
- Eliminate job theft and inventory discrepancies
- Includes camera system with 24/7 monitoring

SecuraTrack

[View Brochure](#)

The Most Affordable Entry into Advanced Inventory Management

SecuraTrack is designed for storerooms that require a person on-site. It's a powerful solution that includes the same CPU as our full-size vending solutions.

- Versatile inventory management — place it anywhere
- Create a storeroom for a fraction of the cost of other solutions
- Add authentication
- Works with SecuraScan

SPECIALIZED CONTROL AND MOBILITY

SecuraChem

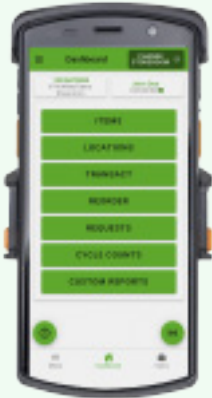

Stay in Compliance - Stay Safe

For environments where tracking is critical. Know who took it and when it came back.

- 18-gauge sheet steel, double-walled construction
- Self-closing 3-point latch
- Same NFPA 30 9.5.3 and OSHA 1910.106(d)(3) spec, same fire rating.
- Fusible link that automatically shuts the door at 140°F

[View Brochure](#)

SecuraScan

Intelligent Scanning - Manage Multiple Locations

Great for service organizations or multi-site facilities. One scanner can manage multiple locations. No per-seat licensing

- Industrial 2D Zebra laser scanner reads every barcode and QR code
- 5.2-inch capacitive touch display, glove-compatible
- Cellular, WiFi, or fully offline with local transaction storage
- One-click cycle counts walk the user through the route, count, and variance flagging

[View Brochure](#)

SecuraWave

When You Need RFID

RFID still has uses in inventory management. We can integrate SecuraWave into storerooms or in any open space.

- Multiple antenna placements to ensure transaction capture
- Convenient recycle bin for RFID tags
- Can be set up as a Kanban system
- Set it up as a scan deck only or add antennas at exit

THE CONNECTED PLATFORM

For Your Mobile Device
Intuitive, Easy, Powerful

SecuraSmart

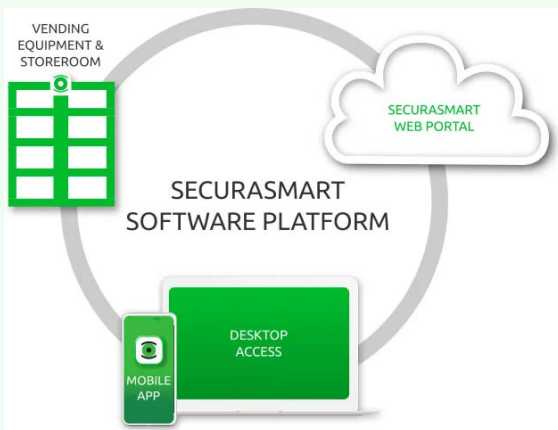

Advanced Software -Ties it All Together

Designed in-house, our proprietary software streamlines inventory control, saving time and increasing efficiency with its user-friendly interface and 24/7/365 access.

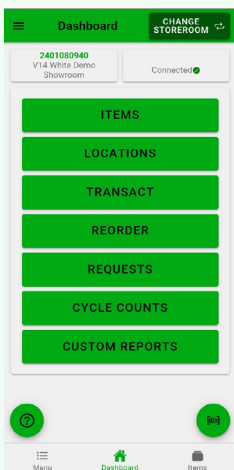

- Seamless integration across all products — one software, one experience
- Powerful mobile version allows you to transact, report, and set up storerooms
- Runs our SecuraScan handheld scanner
- Unlimited users and transactions with every license

[View Brochure](#)

- Gain total visibility by managing all your sites, machines, and users in one simple, connected platform
- Prevent over-ordering and stockouts with data-driven insights and automatic replenishment
- Our onsite software keeps operations running even if your network goes down
- Integration packages made for all major ERPs, such as SAP (including SAP S/4HANA), Oracle, JDE, Microsoft Dynamics 365, NetSuite, Acumatica, Epicor, Infor, Sage, Prophet 21

- Connects seamlessly with any SecuraStock solution
- A complete end-to-end inventory management solution
- Easiest way to get started with SecuraStock
- Barcode scanning for reorders and requests
- Spot-buy non-stock items (add new SKUs by scanning the product barcode)
- Get usage reports and track stock levels via custom reporting
- Create approval notifications based on custom parameters
- Visual cycle count for VMI, reorder based on physical bin levels
