

Precision VMI Automation for Less Than \$125/Scale

✓ Prevent stockouts

✓ Cut site visits by 50%

✓ Automate replenishment, 24/7

SecuraScales are plug-and-play inventory monitoring devices that track real-time stock levels and automatically trigger replenishment orders - so you can spend less time counting and more time selling.

- **Fully Automated VMI**
Accurate, real-time inventory data with automatic reorder triggers.
- **Smart Site Efficiency**
Eliminate wasted visits—restock only when needed.
- **Scalable & Flexible**
Use one scale or hundreds, daisy-chained and controlled by a single device.
- **Simple Setup**
Bluetooth or WiFi connection through the SecuraSmart app.
- **Versatile Placement**
Use in lockers, storerooms, vending machines, or directly on customer shelves.
- **Self-Serve Compatible**
Let customers receive and stock orders—confirm remotely with confidence.

Built to Last, Designed to Work

- Pre-calibrated, no ongoing adjustments needed
- Industrial durability with 3-year warranty (the longest in the business)
- Lowest cost per scale & SKU in the market—50%+ less than competitors
- No external power required - true plug-and-play

Why It's Different (and Better)

Unlike other solutions, ours is field-tested, employee-proof, and built for how people actually work. It just works—reliably, simply, affordably.
